

Palm Oil **Innovation** Group

A journey towards **responsible** palm oil

Palm Oil Innovation Charter for Retailers and Manufacturers

Introduction

The Palm Oil Innovations Group (POIG) aims to support the RSPO through building on RSPO standards and commitments and by both demonstrating innovation to implement RSPO existing standards as well as with additional critical issues. With a focus on the three thematic areas of environmental responsibility, partnerships with communities, and corporate and product integrity, POIG members will strengthen their commitments to socially and environmentally responsible palm oil production and procurement.

POIG focuses on leveraging its experience to create innovations in the palm oil industry and act as advocates for these innovations. POIG will demonstrate that by setting and implementing ambitious standards, the industry can in particular break the link between deforestation, and human, land and labour rights violations, and palm oil.

As retailers and manufacturers we have come together to help find solutions to the challenges the palm oil industry is facing. Our companies use palm oil in the production of our products, and therefore we see it as our responsibility to contribute to the transformation of the way palm oil is produced. Therefore, we wish to contribute to the goals and initiatives lead by the Palm Oil Innovation Group, and with this Charter we outline our commitment to the production of responsible palm oil through implementing the following actions:

Transparency and information exchange

Retailers and manufacturers shall contribute to an updated list with information on the availability of palm oil fractions and derivatives, within the limitations allowed by national and international anti-trust guidelines and competition law.

Retailers and manufacturers shall produce public reports on progress, including reporting on responsible palm oil procurement bottle necks.

Responsible procurement policy and roadmap

Retailers and manufacturers shall maintain a policy stipulating that segregated palm oil which has been third-party verified against the POIG Charter indicators for growers entire operations and landholdings, rather than individual estates, is the ultimate goal.

Retailers and manufacturers shall develop a road map toward practical implementation, which includes specific targets and timelines for global implementation; an action plan for engagement with external brands (for retailers); eliminating Greenpalm Certificates (with exceptions made for smallholder-specific supply chains) and conventional (i.e. not RSPO certified or POIG verified) palm oil from their supply chain.

Supply Chain engagement

Retailers and manufacturers shall communicate their responsible palm oil procurement policy and roadmap to suppliers and customers, and work with them to find solutions and set out expectations of compliance.

Palm Oil **Innovation** Group

A journey towards **responsible** palm oil

In cases where supplier practices are found to be in explicit breach of the POIG Charter, and are found to be unwilling to take remedial action, retailers and manufacturers will, where legally possible, take steps to exclude such suppliers from their supply chain.

Communications

All claims made by members about procurement of POIG-verified oil or products must be backed by independent third party verification.

All members shall promote responsible palm oil, making specific reference to the POIG Charter and clearly communicate the rationale against a palm oil boycott.

All members shall promote positive case studies and showcase innovations in procurement and production of responsible palm oil.

Advocacy

All members shall advocate the integration of POIG grower indicators into the Principles & Criteria of the Roundtable on Sustainable Palm Oil (RSPO)

All members shall advocate for reforms and improvements of RSPO audit procedures, quality control and for complete and comprehensive reporting in Annual Communication of Progress (ACOP) reports.

All members shall advocate the phase-out of the RSPO's Greenpalm Certificate system.
